This book is fully illustrated with step-by-step directions for building your own earth oven. This easy DIY project can be completed with a few tools and in one day. If you have a scrap pile you can build this for free — or buy materials for less than \$30. Kiko Denzer's book includes directions on how to tend the fire and how to make sourdough hearth loaves in the artisan tradition.

Good building soil is often right in your backyard, under your feet. Build the simplest oven in a day! With a bit more time and imagination, you can make a permanent foundation and a fire-breathing-dragon oven or any other shape that you can dream up.
