<b>DESCRIPTION</b> Please describe the practice you have developed.						
Maintaining a neighborhood initiative of an ecological urban garden in the center of Barcelona.						
<b>AIMS AND OUTCOMES</b> Which are the main purposes tackled in a community garden with this tool? Which concrete results have been observed at short and long term?						
Increasing participation of the residents of the neighborhood in the activities developed in the garden. Contribution to the diffusion of organic gardening production practices. Promotion of self-cultivation. Providing a space for learning and experimentation of ecological urban gardening practices, its health benefits, waste management, composting and sustainability in the neighborhood. Bringing diversity to the neighborhood leisure offer.						
<b>WHAT MAKES IT A GOOD PRACTICE OR TOOL?</b> Identify which elements make this action a good practice, for ex. Innovation, coherence, link with other projects or people, favours social mixing, simplify work, earn time or money, etc.						
Increasing social cohesion between individuals and groups in the neighborhood. Education with an active and participative methodology. Promoting intergenerational and intercultural relations between neighbors and visitors.						
<b>STEP BY STEP</b> Please, describe how to put in practice, guiding with clear instruction and materials needed someone that would like to experiment your tool in a local community garden around Europe						
Identification of a suitable and appropriate location for the garden. Making a call for participation open to all individuals and groups in the area. Design, implementation and execution to the project by the residents. Constant revitalization of the space with: workshops, community working days, popular meals and other.						
<b>COMPETENCES</b> Which are the previous knowledge and skills required to put in practice this tool?						
Ability in direct dialogue with people. Desire to being involved in community projects. Respect for the principles of community participation. Leadership and organizational ability.						
<b>EVALUATION</b> How do you normally evaluate the outcomes of this tool?						
Levels of presence in the garden. Participation of garden in the neighborhood activities. Levels of participation of residents in the garden activities.						

<b>DISCLAIMING AND DECLARATION OF HONOUR</b>			yes	no
