BACKGROUND A good practice is a concrete action, successfully experienced at local level with a defined target group, leading to effective results. Please describe the practice you have developed.			
A group of people eager to create their own urban garden in Rome joined together in 2012. The space chosen for the urban garden was the open air of CASALE GARIBALDI, an old house that had survived from building speculation in the highest density populated area of Rome, the Casilino 23 neighborhood. Unfortunately the analysis of the soil revealed that it was contaminated. Despite that, they didn't give up on their project, but found a practice to rehabilitate the land.
